WEB 3.0

Easy and Safe. A modern approach to blockchain
investing in your crypto portfolio.

INVESTMENTS WEB 3.0 BLOCKCHAIN

WEB 3.0 and Blockchain are two technology trends that together create new investment opportunities.

WEB 3.0 is an evolution of the Internet that makes it more decentralized, secure and autonomous. Blockchain, on the other hand, is a technology that enables decentralized and transparent recording data, which is the basis for many cryptocurrencies and decentralized applications.

Flexible customization
and many currency pairs

BINARY OPTIONS

Predict price movements, manage the percentage spread for fixed profits.

THE BASIC PRINCIPLE OF OPERATION

The basic working principle of cryptocurrency options is that they allow you to multiply potential profits for a relatively small change in the price of an asset. For example, for every percentage change in price, the leverage of the return can be multiplied several times, often ranging from x1.5 to x5. This means that even small price changes can lead to significant results for the trader.

DUAL INVESTMENT

This is an investment strategy that involves simultaneously investing in two different currencies in order to reduce risk and protect against currency market volatility. This approach allows investors to diversify their portfolio, minimizing potential losses associated with currency fluctuations courses.

2	ETH	Ethereum	Buy	\$2,934.99
3	USDT	Tether	Buy	\$1.00
4	BNB	Binance Coin	Buy	\$410.01
5	USDC	USD Coin	Buy	\$1.00
6	XRP	XRP	Buy	\$0.795020
7	ADA	Cardano	Buy	\$1.04
8	SOL	Solana	Buy	\$95.81
9	AVAX	Avalanche	Buy	\$89.05
10	LUNA	Luna	Buy	\$50.98

Allows you to hedge risk and maximize returns.

~ 27% PER MONTH

LIQUIDITY FARMING

Proprietary DeFi farming allows participation in decentralized projects. Automated system enables trades and other complex tasks.

Liquidity farming is a strategy used in decentralized financial (DeFi) protocols on blockchain that allows users to earn cryptocurrency by providing their liquidity for trading in asset pairs.

AUTOTRADING

Automate trading using advanced AI algorithms

Grid algorithms

at 25% per month
profitability

A unique system for connecting to trading pools and performing trades automatically uses advanced grid algorithms.

Use auto-investing to gradually build up your portfolio with regular purchases of assets and products of the system. Get additional bonuses, increase passive income and connect automated cryptocurrency accumulation.

GRID ALGORITHMS

BENEFITS

- Grid trading algorithms are based on software code that automatically makes decisions based on predefined rules. This eliminates the emotional factors associated with trading and eliminates human error, which is especially important in volatile market conditions.
- Algorithms are able to react to market changes within fractions of a second, which makes it possible to execute trades instantly. This avoids missed opportunities and reduces the risks associated with price changes.
- Grid algorithms can break large orders into smaller orders, optimizing execution and minimizing the impact of trades on market prices. This is especially important when trading large volumes.

CARGIO

What is Cargio Lending?

The crypto-lending system on the Cargio platform provides clients with the opportunity to borrow funds using their cryptocurrency assets as collateral.

This allows you to manage your funds as efficiently as possible, while gaining access to additional resources for investing or meeting financial needs.

The loan rate is calculated only for the duration of the loan.

LENDING WEB 3.0

LENDING PROGRAM

Cargio presents to you an innovative crypto-lending system that allows our clients to access additional financial resources and expand their investment opportunities.

This tool gives you flexibility and freedom to manage your funds on the platform.

CARGIO

How the Crypto Credit System Works on Cargio

Cryptocurrency Pledge

Users can use their cryptocurrency assets as collateral to obtain a loan. Collateral can be varied and include popular cryptocurrencies.

Loan Amount:

The loan size depends on the value of the collateral and current market conditions. We provide flexible conditions that allow you to choose the desired amount.

Cargio provides a high level of security and transparency in the crypto lending system. All operations are carried out in compliance with modern safety standards.

LENDING WEB 3.0
